📍 Tandag City, Surigao del Sur, Philippines

Nationality: Filipino

Date of Birth: 07/09/2004

SKILLS

- Java Programming & Java Swing GUI Development
- Python Programming
- MySQL Database Management
- Object-Oriented Programming (OOP)
- HTML, CSS, and JavaScript
- Data Structures, Algorithms, and Arduino Programming

SOFT SKILLS

- Teamwork and Collaboration
- Effective Communication & Problem Solving
- Time Management & Adaptability
- Fast Learner

SUMMARY

A motivated and hardworking Computer Science student seeking an On-the-Job Training (OJT) opportunity where I can apply my knowledge in programming, software development, database management, and web technologies while gaining practical experience in a professional environment.

EDUCATION

North Eastern Mindanao State University

2023 – Present

School Description: A higher education institution committed to providing quality education and developing competent, innovative, and socially responsible graduates. The institution offers programs that equip students with theoretical knowledge and practical skills necessary for professional careers in technology, business, and other fields.

Lapinigan National Senior High School

Senior High School Graduate

Year Graduated: 2023

Lapinigan National High School

Junior High School Graduate

Year Graduated: 2021

ACADEMIC PROJECTS (PROJECT EXPERIENCE)

(2024 – Present)

Banking System & Hotel Booking System | Lead Developer / Class Project

- Developed a banking application featuring secure user registration and login functionalities.
- Integrated a MySQL database for seamless backend data storage, retrieval, and management.
- Designed a comprehensive hotel reservation system with custom booking and customer management features using Java Swing GUI.

Machine Learning Data Analysis | Data Analyst / Academic Project

- Performed data preprocessing, cleaning, and structural analysis using Python.
- Applied various machine learning techniques for predictive analysis and trend forecasting.

Fitness Tracker Application | System Architect / Concept Project

- Created a comprehensive system concept for monitoring day-to-day fitness activities and health progress.
- Designed user workflows and logic structures adhering to the Software Development Life Cycle (SDLC).
